Narrative Prototyping

Using Story to Create Better User Experiences

studio

A diagram consisting of three thin black lines. One line starts at the top left, below the word 'Protagonist', and extends diagonally down and to the right. Another line starts at the top right, below the date, and extends diagonally down and to the left. A third line starts at the bottom right, near the word 'studio', and extends diagonally up and to the left. The three lines converge towards the center of the slide.

Let's start
with a story.

Image: Alex Boyd via Unsplash

PERSONA VS BRIEF VS PROTOTYPE

He'd tripped on a rake handle, and
called the ambulance himself...

I ended up staying for the next two weeks...

I could figure these things out one at a time, but...

I hate needing help.

...keeping me informed so I didn't go
crazy with worry...

...she already had the information
I'd submitted online...

Emotion and
motivation as
well as function.

A SUPPORT SERVICE FOR ADULT CAREGIVERS OF AGING PARENTS

With the passing of the Affordable Care Act (ACA or “[Obamacare](#)”), American healthcare companies are suddenly put into active competition, and must look for differentiators other than price.

Many adults must take on significant [responsibility for their parents’ health and well-being](#)—often at the exact moment they’re most engaged with careers and children of their own.

A “[concierge](#)” [service](#) for these caregivers presented a clear opportunity, and a complex design challenge.

Janet: “DIY Caregiver”

- 53 years old
- Married with 2 kids - 16 & 20
- BS Economics, Certified Public Accountant
- Flips houses for extra income
- Lives in suburban Portland
- Strong sense of responsibility to father

Information needs

- Needs advice. Her father has broken his hip, and she feels unprepared to make choices about his care and living situation.
- Accustomed to transparency, and comfortable with detail.
- Likes to review information in depth before making decisions.

Functional needs

- Broadly competent, and prefers doing things herself when feasible.
- Needs vetted professionals to take care of many aspects of elder care.
- Fairly tech-savvy, and appreciates control options on multiple platforms.

Financial needs

- Has significant savings, but also has to pay college tuition for two kids.
- More money-smart than most, but still confused by insurance and state assistance programs.

Emotional needs

- Under tremendous emotional and time pressure.
- Relies heavily on trusted partners, and is loyal to them.
- Feels a strong need to “do right” by her father.

Opportunity: Provide a service that helps caregivers plan for and deal with parents’ non-medical needs.

A SUPPORT SERVICE FOR ADULT CAREGIVERS OF AGING PARENTS

A typical **cross-functional** design team:

- a **User Experience Designer**
- a **Service Designer**
- a **Communications Designer**
- a **User Research** team
- a **Creative Director**
- **me**

“What if I
just wrote it
as a story?”

Pratt Institute

MASTER OF INDUSTRIAL DESIGN PROGRAM
2002-2004

More complexity.
More channels.
More opportunity.
More platforms.
More touchpoints.

More expected.

Phase the project.

|

Try Agile.

|

Try to write a better brief.

What if we
just wrote it
as a story?

Narrative is the Most Powerful Design Tool You're Not Using

Designers love to call themselves storytellers. So where are the stories?

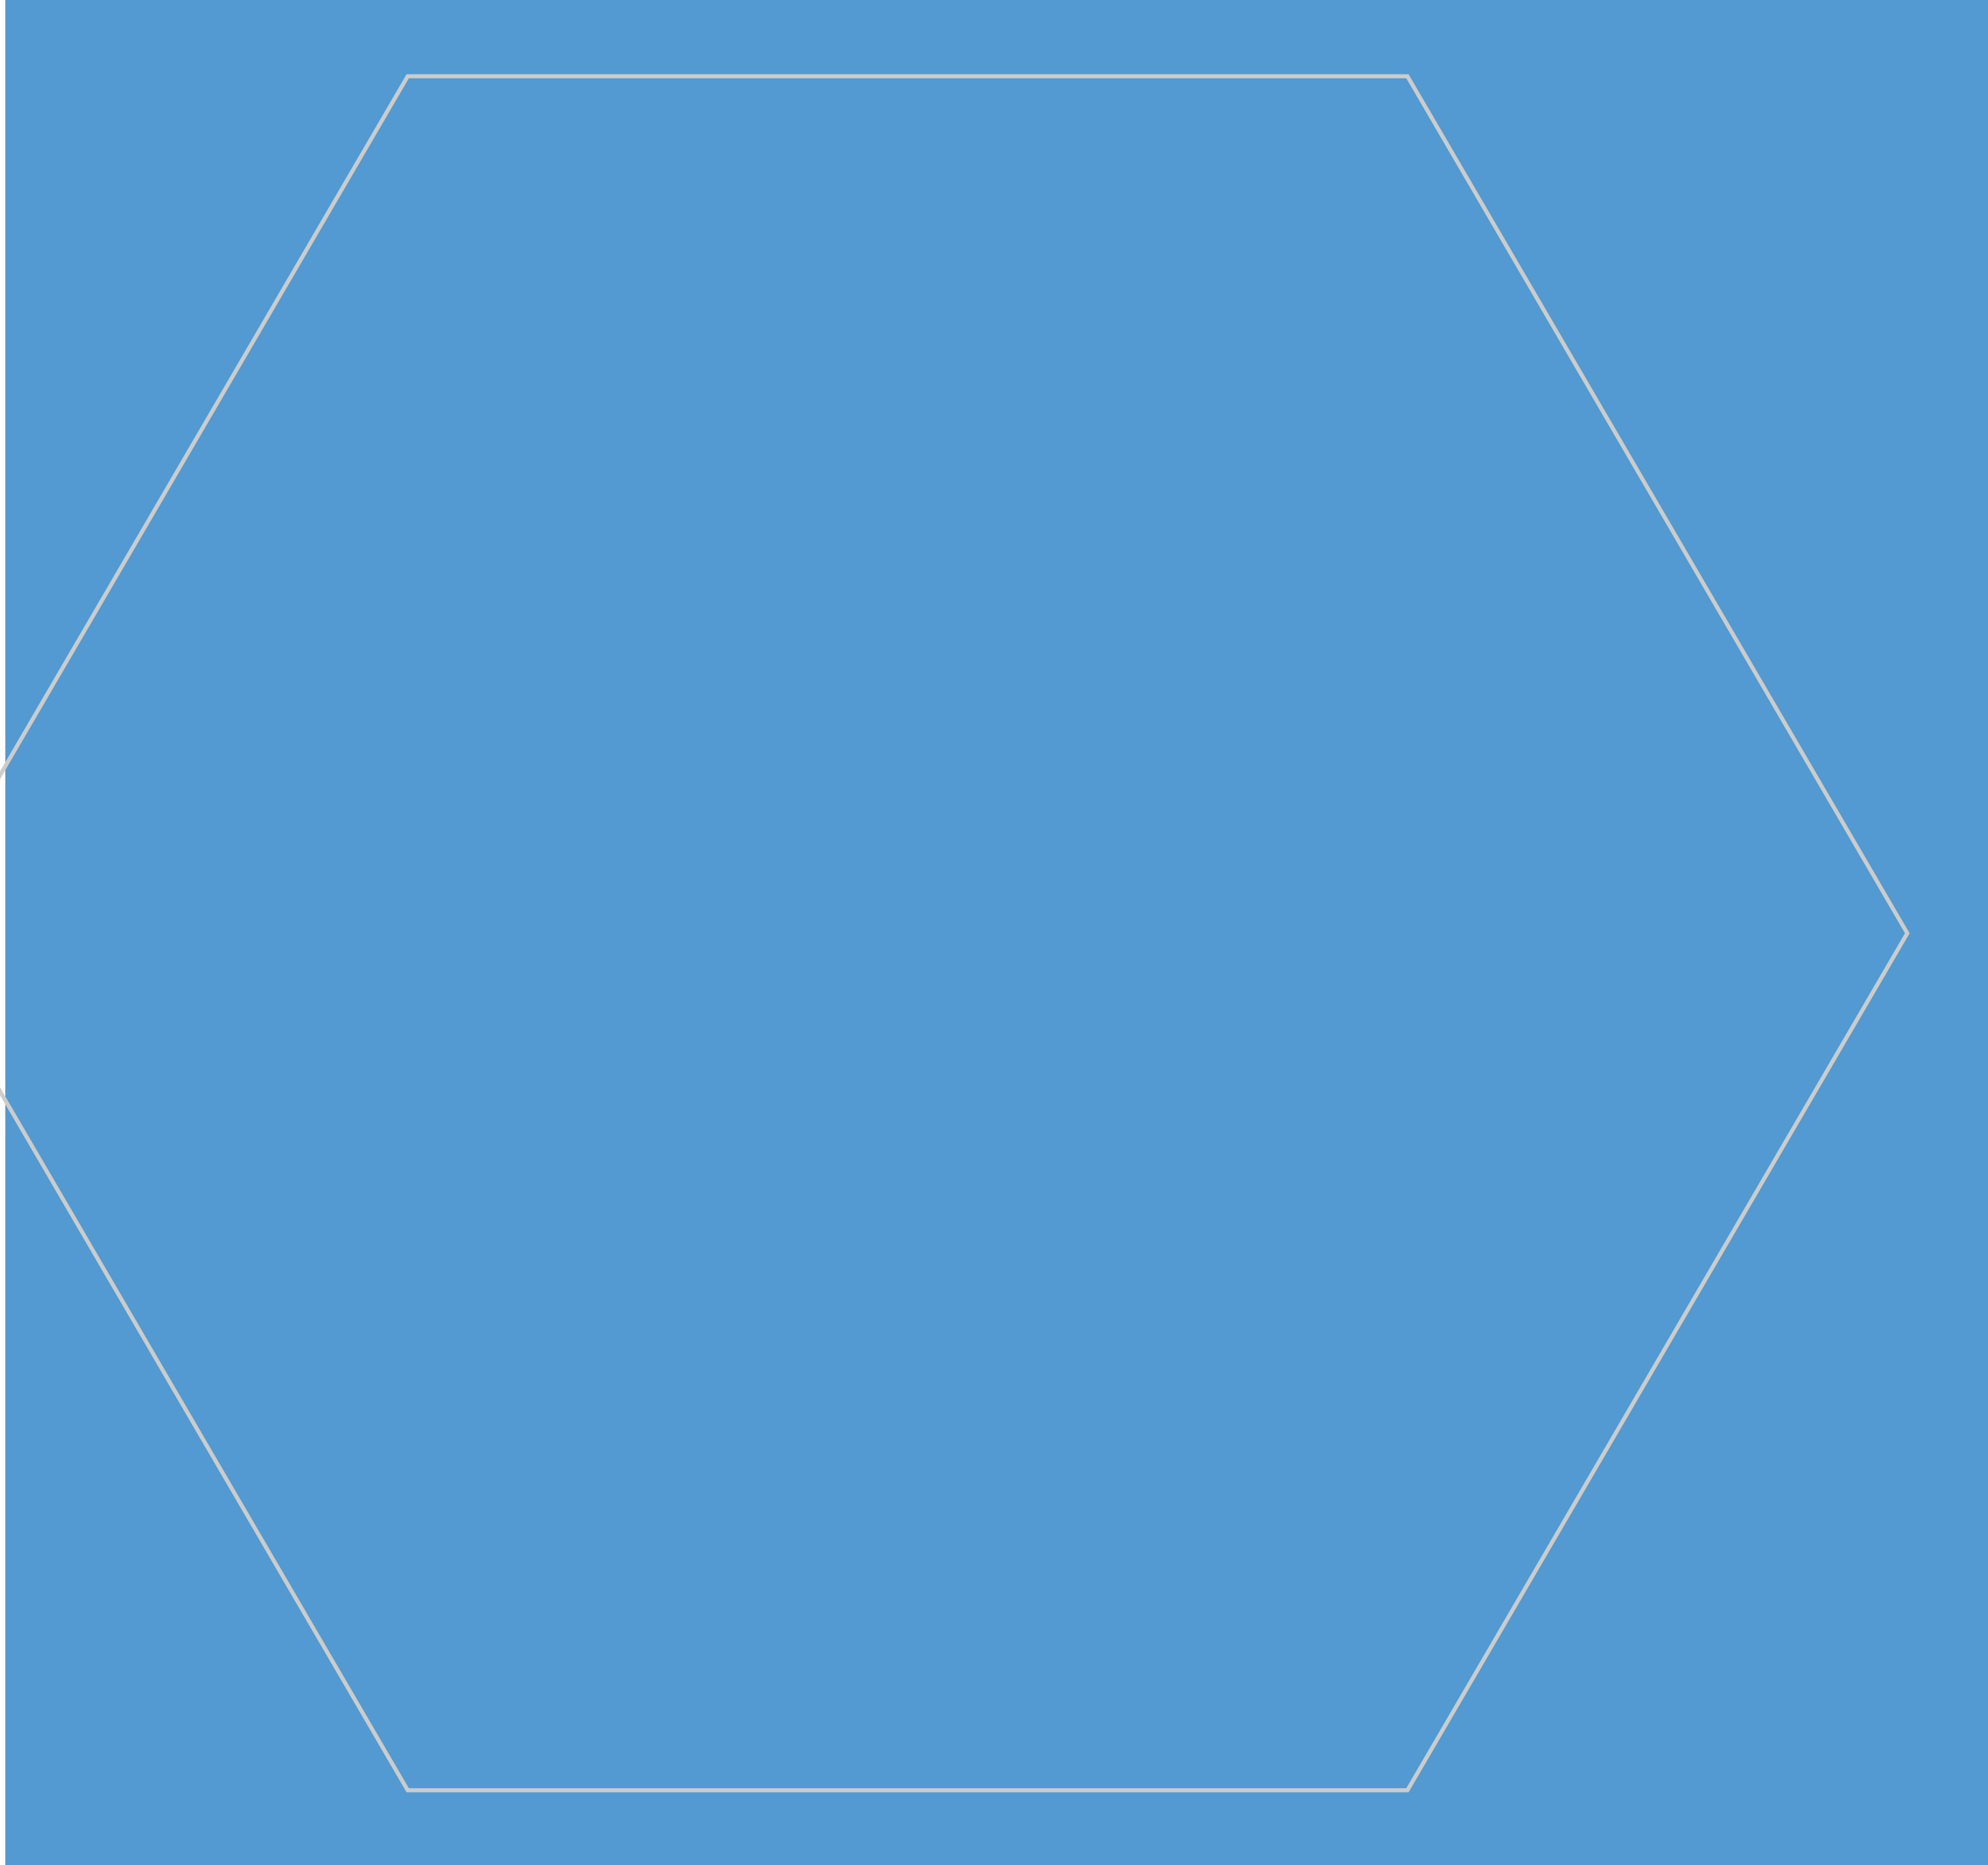

Carl Alviani

Jun 1, 2018 · 7 min read

What if we
treated the
story like a
prototype?

We decided to
call this **narrative
prototyping**.

What does an approach like this get you that
traditional approaches don't?

...a phone call from Francisca...

...a financial planner...

...I was able to use the CSS website
to set up a Home Squad visit...

... a list of local contractors they'd already vetted...

... anything that's dad-related shows
up in the online schedule...

... I just clicked the “Request Transportation”
button at the bottom of the event ...

... this “tip-of-the-week” thing they send
me through the email ...

Interactive
elements
in context.

Better conversations, earlier in the process.

“What if we added a **scheduler** to the homepage?”

“Wait, shouldn’t that be **app-based** instead of **web-based**?”

“I don’t think Janet would actually do it **in that order...**”

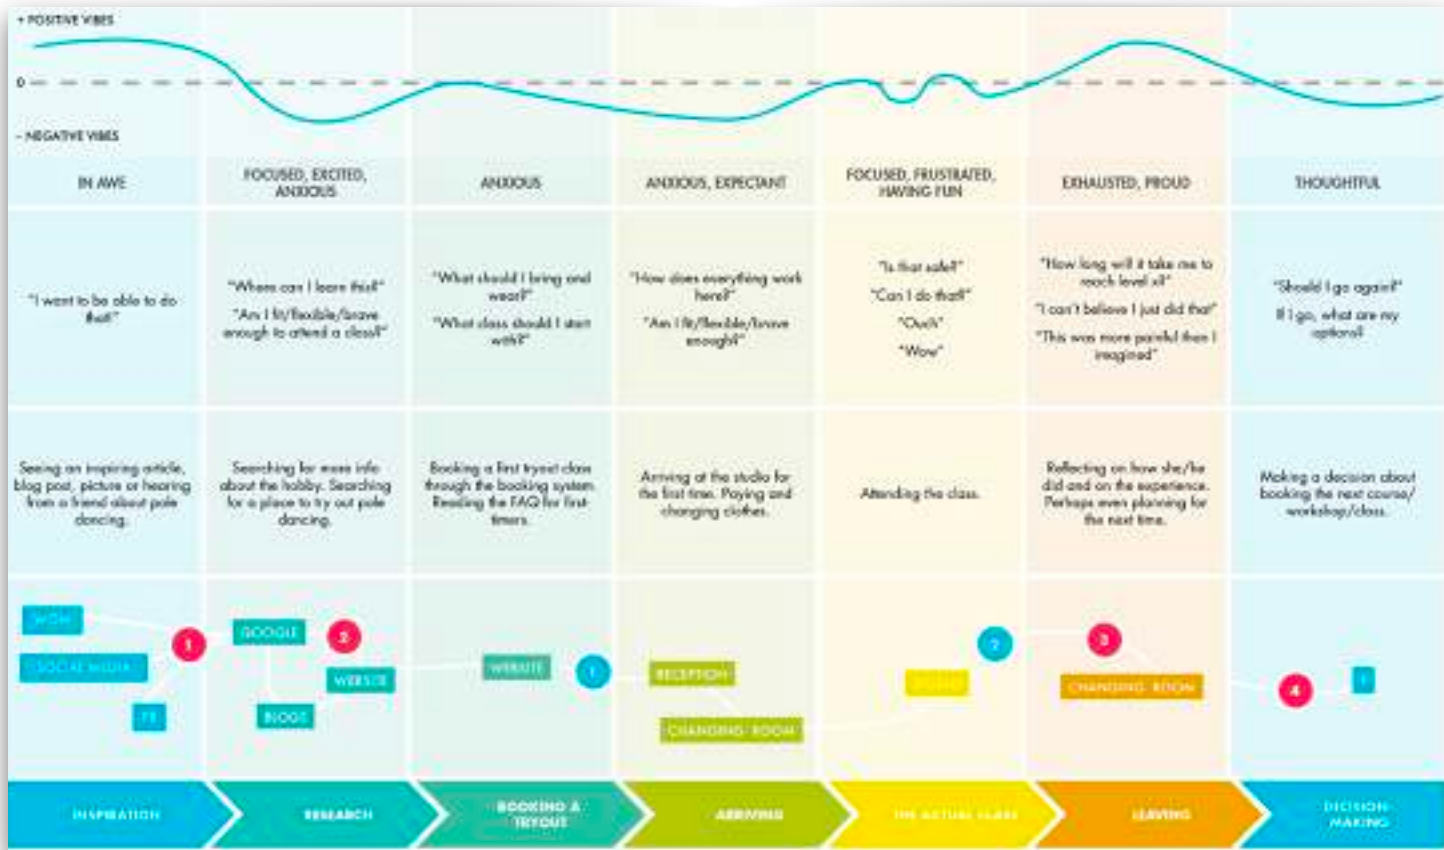

“A dashboard like that would be **pretty easy to code**, as long as we...”

“I’m pretty sure she’d want onboarding to take place via **phone conversation** rather than an online form.”

What could you
make with a
story like this?

KEY CHARACTERISTICS OF A WELL-RESOLVED NARRATIVE PROTOTYPE

EMOTION/MEANING

Strong narrative makes us feel the impact of design decisions, so the results are meaningful and not just functional.

STRUCTURE

A story puts design elements in context: we can see what's gone before the focus of design, and what comes next.

FLEXIBILITY

Written narrative is uniquely flexible, able to absorb any concept, prototype, or iteration your cross-functional team creates.

CLARITY (+buy-in)

Everyone on the team contributes to the story, so everyone feels ownership. It becomes a reference point throughout the project.

RAW MATERIAL

A refined, detailed narrative forms a great basis for user journeys, technical specifications, copy decks, content, etc.

DISPOSABILITY

Any individual iteration of a story is as disposable as a sketch—and often easier to edit than a visual.

HUMANS THINK IN STORIES

Every user
is a hero.

The unique power of hero-centered stories
is **hardwired** into human psychology.

HUMANS THINK IN STORIES

Narrative is how we **make sense of the world**. Stories are not just a way of remembering. They're also a way of **aligning and motivating**.

Solving problems, individually and in groups, is humanity's unique advantage. It requires **creative collaboration at scale**.

HUMANS THINK IN STORIES

“...How did Homo sapiens manage to cross this critical threshold, eventually founding cities comprising tens of thousands of inhabitants, and empires ruling hundreds of millions? The secret was probably in **the appearance of fiction.**

...Large numbers of strangers can **cooperate successfully** by believing in common myths.

...Just try to imagine how difficult it would have been to create states, or churches, or legal systems if we could speak only about **things that really exist**, such as rivers, trees and lions.”

HUMANS THINK IN STORIES

If the details don't fit the narrative, **our brains will make them fit.**

Given the choice between narrative consistency and factual accuracy, most humans will **choose narrative every time.**

HUMANS THINK IN STORIES

It's also how we **make meaning** for ourselves.

Information makes more sense when it fits into a narrative—especially one we can imagine ourselves being part of.

Likewise, experiences that follow a clear narrative structure make more sense: they **proceed predictably**, they're easier to **rationalise and remember**, and they satisfy a hardwired **emotional need**.

This is largely where “meaning” comes from.

THE SEVEN PART STORY (IMPROV EXERCISE)

1/ Once upon a time...

2/ And every day...

3/ Until one day...

4/ And because of that...

5/ And because of that...

6/ And because of that...

7/ Until finally...

Exposition

Incident (+goal)

Allies + resources

Struggle

Climax

Resolution

Exposition (Old Normal)

- Janet: 53 years old
- Married with 2 kids - 16 & 20
- BS Economics, Certified Public Accountant
- Flips houses for extra income
- Lives in suburban Portland (USA)
- Strong sense of responsibility to father

Struggle

To set her father up in a routine that keeps him safe, happy, in contact with family, while allowing her to continue working.

Incident (goal)

Father breaks hip.
Wants to return to normalcy, and feel that she's doing right by her dad.

Climax

Move-in day

Allies & Resources

Website, app, database, printed materials
Personal Care Advisor

Resolution (New Normal)

Dad is moved in, family life resumes, new issues are dealt with quickly. Janet feels satisfied and back in control.

Old Normal

(EXPOSITION)

New Normal

(RESOLUTION)

Janet

Active, capable working mom has a deep sense of responsibility

Dad is moved in, family life resumes, new issues are dealt with quickly, Janet feels satisfied and back in control

Luke

Frustrated, starry-eyed farm kid has a mysterious background

Death Star destroyed, Luke a hero, Rebellion saved

Boy Who Cried Wolf

Clever, bored kid spends all day, every day watching the sheep

Sheep are killed or scattered, kid goes back to work with a new sense of seriousness

Uber/Lyft

Expensive, unpredictable formal taxi system, plus a range of semi-formal car services

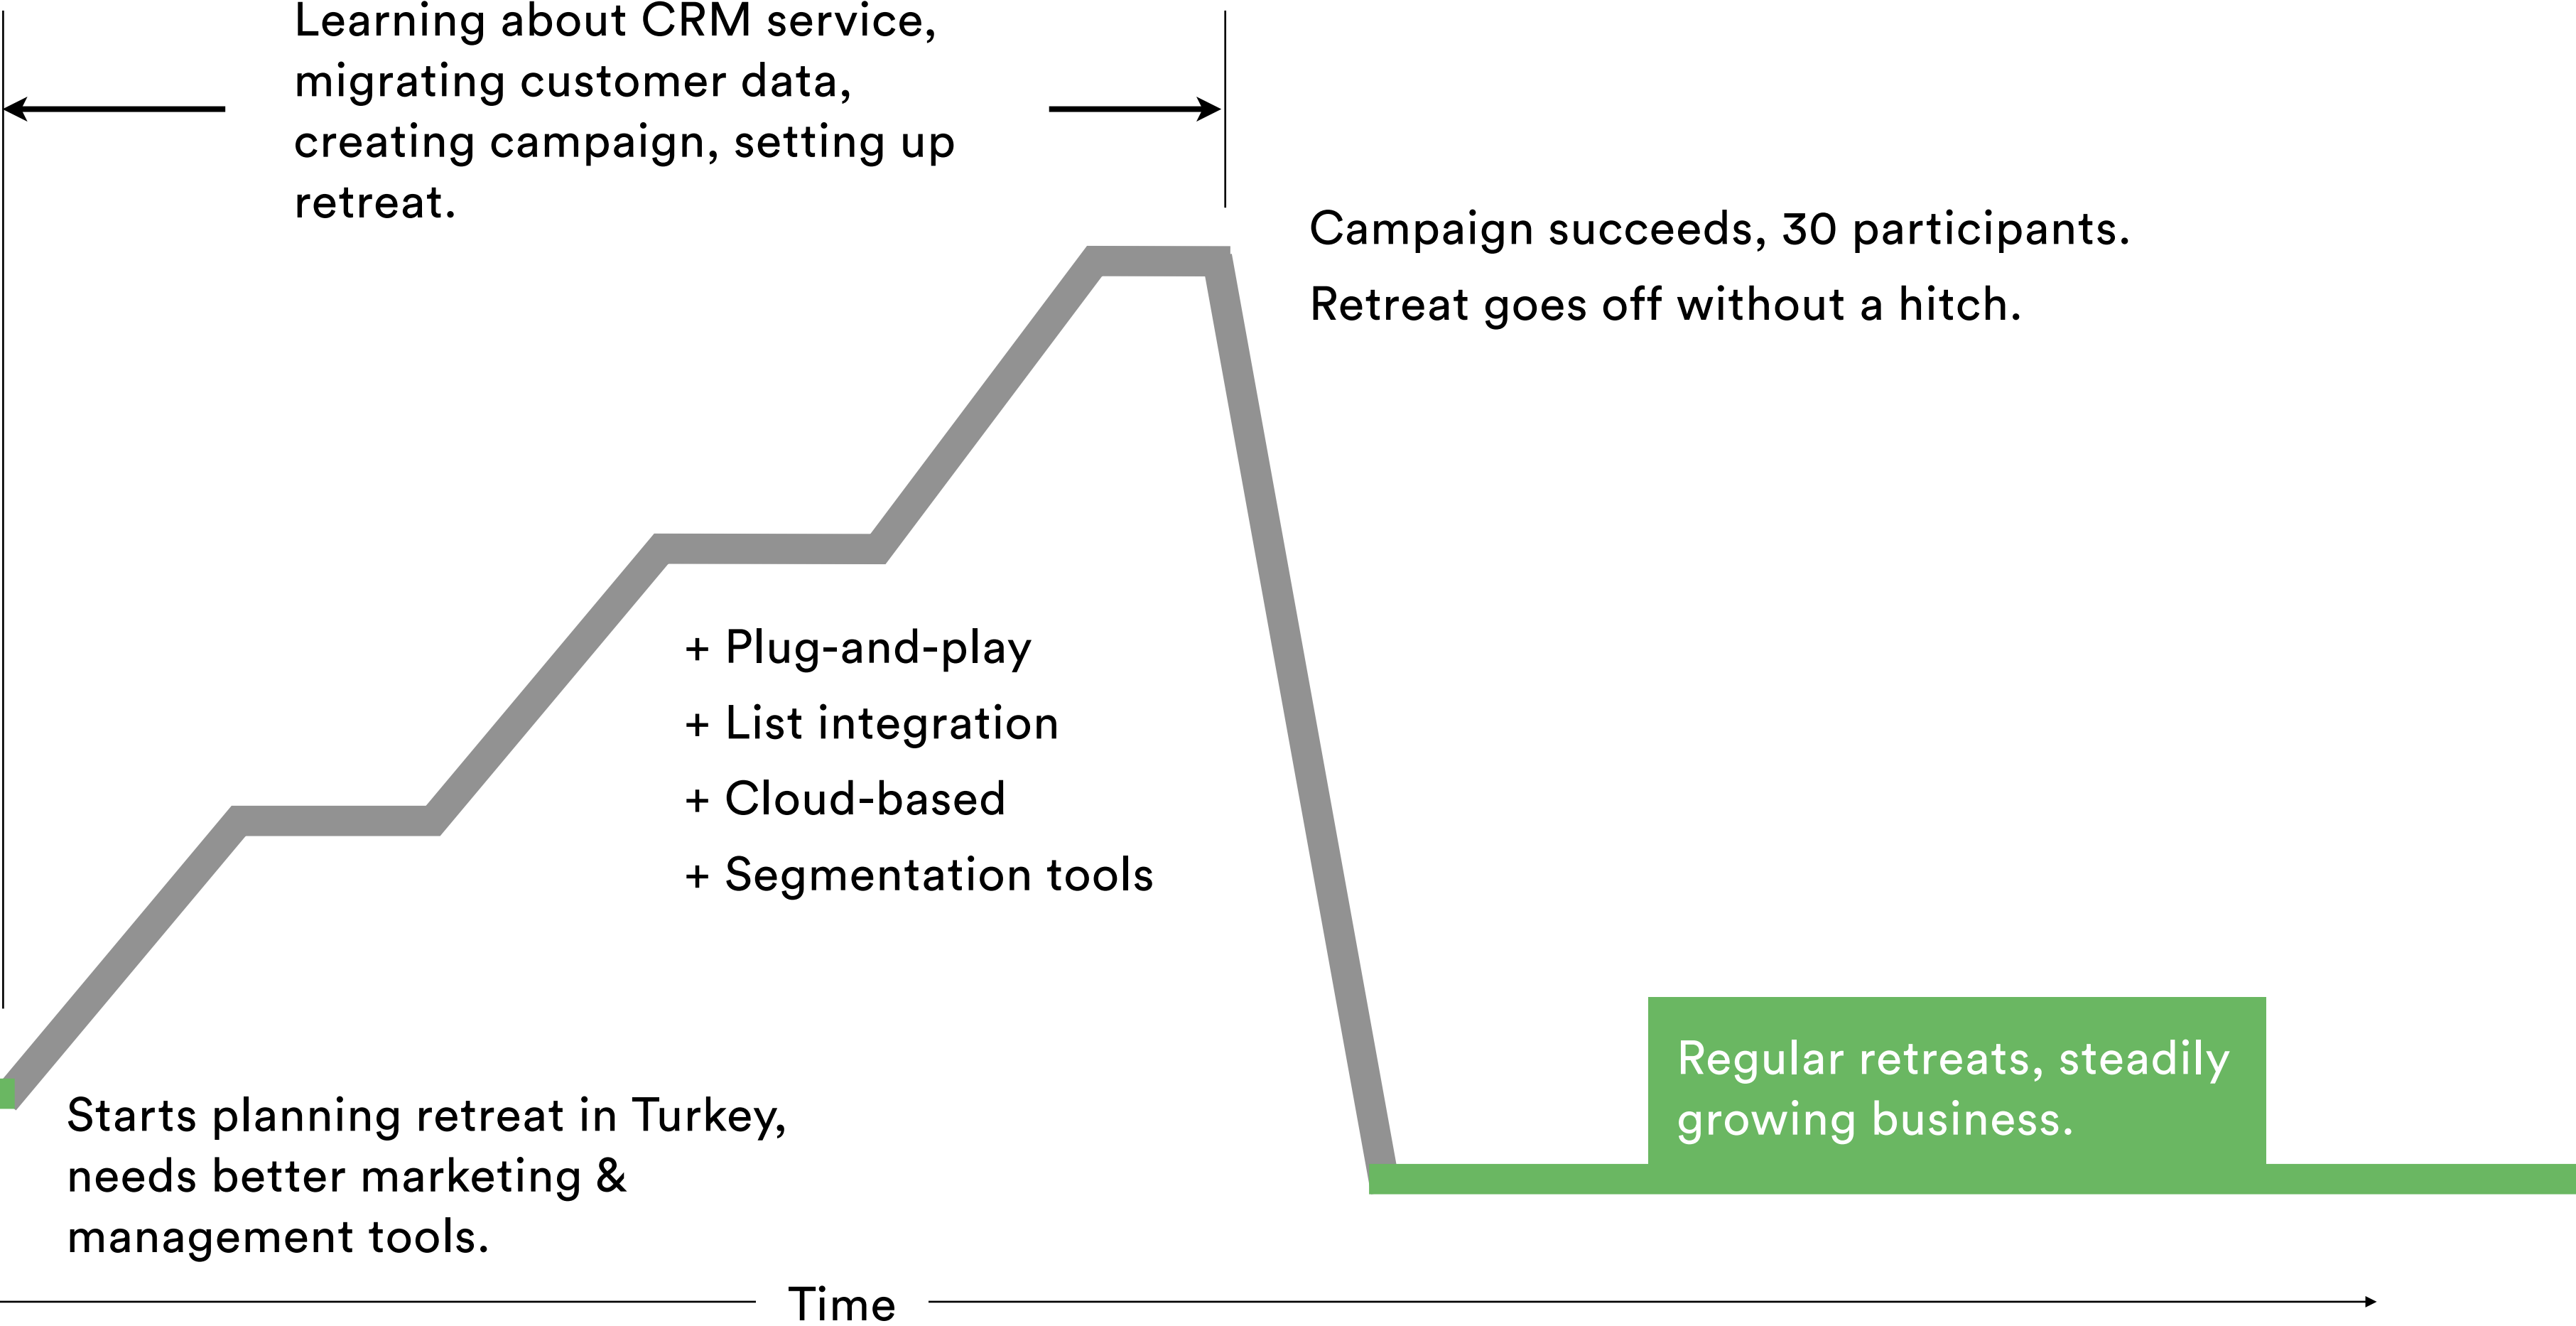

Taxi rides are predictable and transparent, minimal effort for the user

EXAMPLE: CLOUD-BASED CRM SERVICE FOR A SMALL BUSINESS

THE DESIGN THINKING MODEL—ACCORDING TO IDEO

Gather
Inspiration

Inspire new thinking by
discovering what people
really need.

Generate
Ideas

Push past obvious
solutions to get to
breakthrough ideas.

Make Ideas
Tangible

Build rough prototypes
to learn how to make
ideas better.

Share the
Story

Craft a human story
inspire others toward
action.

THE STORIES DESIGNERS TELL

Brand Story

The Organization is the Hero

Story of the unique struggles and success of the organization/business. seeks to build recognition and connection with consumers

Design Story

The Design Team is the Hero

Story of the design process and efforts to Create something extraordinary. Seeks to Impress the reader with innovation and competence.

Human Story

An Individual is the Hero

Story of overcoming an individual challenge. Seeks to create resources and allies for empowering the user.

Protagonist

Protagonist Studio is a narrative-centred design consultancy based in London and Amsterdam.

We take a “story first” approach to User Experience, Product Strategy and Content Development, that gets clients to a better product or service experience faster, with less wasted effort.

We work with organisations to craft narrative that shows where to go next.

studio

Victoria Owal-Kirk, Co-Founder

Victoria has over 15 years of experience helping businesses profit from change at some of the world's most successful creative agencies. She's led strategic and creative development on products, service design, and integrated brand experience programmes for a host of international businesses, including [Unilever](#), [Lenovo](#), [Barclay's](#), [Kellogg's](#), and [Bupa](#), as well as non-profits and social enterprises. Her training in product design gives her a knack for making things that function well, delight consumers, and make business sense.

Before co-founding Protagonist, she was Strategy Director at [Isobar](#) (Dentsu Aegis), and prior to that spent 6 years with the [Ogilvy Group](#) in Director and team leadership roles, including a secondment to Ogilvy in Bangalore to build a strategic planning capability.

Victoria holds a Masters in Industrial Design from the [Pratt Institute](#), and has lived and worked in the US, Asia, and Europe. A no-nonsense native New Yorker, she's called London home for over a decade.

Carl Alviani, Co-Founder

Carl specialises in telling stories about the process, artifacts, and consequences of design. He's helped dozens of companies and agencies improve their design outcomes through research-based narrative, and his writing has appeared in [WIRED](#), [Fast Company](#), [Harvard Business Review](#), [Gizmodo](#), [Forbes](#) and elsewhere, on topics ranging from service innovation to urban planning and the ethics of interaction design – anywhere creative decisions affect human experience. He spent five years shaping content and marketing strategy for [Ziba Design](#); before that, he edited and wrote at two of the world's longest-running design websites, Core77 and Coroflot.

Previously a 3D CAD modeler, a high school science teacher, and a Peace Corps Volunteer in East Africa, Carl holds a BS in Structural Engineering from UC San Diego and a Master of Industrial Design from the [Pratt Institute](#).

Having lived and worked in New York, Portland, Sweden, Denmark and Singapore, he's currently based out of Amsterdam.

WHAT WE OFFER

Content

From microcopy and web copy to case studies and manifestos. We help get your ideas into the world, to help win understanding and engagement from business and consumer audiences alike.

Consulting

Our team works with yours to reduce risk. We'll get you to the heart of the matter, align your team around the right solution, and chart a clear path through the complexity.

Prototypes

Working with your team and your assets, we'll craft stories that save you time and effort, and serve as a unifying reference throughout the project. We'll help translate it into workstreams and deliverables too.

Workshops

We provide the tools, templates and exercises that help you spot narrative elements in a pile of research and concepts, and shape them into something that gets your whole team aligned.
