STMPD STUDIOS

STUDIO 2

Studio 2 is the ideal studio for mixing and recording vocals/overdubs. Absolutely perfect acoustics, PMC MB3-XBD monitors, a Neve Genesys Black console, mastering grade Merging Horus converters, Pro Tools HDX, and high end outboard. Track vocals through the industry standard 1073/Pultec/CL-1B chain, or mix using the analog Neve console for summing.

Want to use your own laptop with your own DAW? Simply hook up through USB and HDMI and you can work in the sweet spot, using the large touch screen of the Neve Console, with all Neve inputs and outputs being accessible straight from within your DAW.
