

STMPD STUDIOS

STUDIO 3

Studio 3 is based around an Avid S6 / Pro Tools HDX system with mastering grade Merging Horus converters. This studio is famous for its magic “living room” style atmosphere and layout, which has proven to be a comfortable and creative zone where writers and musicians and also directors and actors immediately feel at home.

Besides some great outboard, this room also houses an amazing synth collection. A giant 75” led screen in the booth makes ADR and foley recording a pleasure.
