

STMPD STUDIOS

STUDIO 4

Studio 4 is our main tracking room because of its large live room with variable acoustics, perfect for recording bands or other ensembles. The control room features a Neve Genesys Black G48 console equipped with all options. Choose between the classic Neve 1073 preamps or the ultra clean Merging Horus preamps for your preferred sonic flavour. The live

room has a very nice natural reverb which is easily adjusted with absorbing and reflecting gobos. Besides tracking, the control room is well equipped for a nice analog mix, up to 5.1, with perfectly synced video if needed. Want to use your own DAW? A simple USB connection will give you access to all Neve inputs and outputs.

DIMENSIONS

Control room 25m2
Live room 45m2

CONSOLE
