

STMPD STUDIOS

STUDIO 5

Studio 5 has everything you need for comfortable writing and production with your own DAW. No compromises have been made on acoustics, monitoring and ease of use: just hook up a single USB cable and you are connected. You can also connect your own audio interface. This studio is also very well suited for video editing.

If you want to use outboard gear, you can rent an additional API 500 series “lunch box” containing a selection of high-end mic preamps, EQ’s and compressors.

DIMENSIONS

18m2
